ARYAN BAJRACHARYA

Bharwacho, Bhaktapur • 9847465703 • aryanboy12@gmail.com

Im a 7th semester Batchelor in information management(BIM) student and have developed skills in JavaScript and Python. I also have experience working with React native, NextJS, Github and Figma.

PROJECTS

E-commerce platform

A full-stack e-commerce site built with Next.js, featuring separate customer and owner dashboards. Owners can manage products, customers can shop easily, and the platform includes a "For You" recommendation system based on user activity and tags. Also implemented Esewa integration for payment

GitHub: github.com/aaryanboy/ecom
Deployment: https://na-pukhu-mini-market.vercel.app/

Top down RPG

Developed a top-down RPG using JavaScript, Kaboom.js, and Tiled, with smooth movement, collisions, and object interactions rendered on the HTML5 Canvas.
GitHub: github.com/aaryanboy/jsgame

Front End Website

Punya Jewelry is a frontend marketing website built using Next.js and TypeScript. The project helped me strengthen my understanding of Next.js fundamentals, while also improving my skills with Tailwind CSS and TypeScript.
