PROFILE

Final-year BIM student who builds full-stack web apps and games with React (Next.js). Loves turning ideas into responsive, interactive experiences, solving real problems, and designing clean UIs backed by solid logic. Excited to bring creativity, problem-solving, and end-to-end development skills to an internship.

PROJECTS

E-commerce platform/ NextJS, MongoDB, SupaBase

- A full-stack e-commerce platform using Next.js, MongoDB, and Supabase. Admin can manage products and users can purchase with eSewa integration.
- GitHub: github.com/aaryanboy/ecom
- Deployment: na-pukhu-mini-market.vercel.app/

Top Down RPG/ Kaboom.js, Tiled, HTML Canvas, JavaScript

- A browser-based 2D RPG built using Kaboom.js and Tiled with player movement, collisions, and tile-based maps.
- GitHub: github.com/aaryanboy/jsgame
- Deployment: jsgame-rpg.vercel.app/

Punya Jewellery/ Jewellery Storefront Website (React, Next.js, Tailwind CSS)

- A responsive jewellery storefront built with React and Tailwind CSS with modern UI and mobile-friendly design.
- Made it mobile-friendly and accessible across devices
- GitHub: github.com/aaryanboy/PunyaJewellery

Mini Job/ Figma, React, TSX

- I designed the UI in Figma and converted it into a responsive React frontend with reusable components and clean layout.
- GitHub: github.com/aaryanboy/Mini-Job
- Deployment: mini-job-frontend.vercel.app/
- Figma:figma.com/design/4wd6hBQDvceTUOiU4Qu5Ul/minijobs?node-id=2008-3&t=voGUIYUrOe978CEm-1

TRAINING/CERTIFICATIONS

Quality Assurance/ SkillShikshya

Completed a 2-day onsite workshop on software testing and release processes. Learned API testing using Postman, test case basics, and how applications are prepared for production and end users.
