Education

Bhaktapur Multiple Campus | Tribhuvan University
Bachelor of Information Management (BIM)

Doodhpati, Bhaktapur
Graduation Date: 2026

Nepal Police School
Higher Secondary Education (Computer Science)

Naskisthan, Sanga
2020 – 2022

Technical Skills

Programming Languages	JavaScript, TypeScript
Web Development	HTML, CSS, React.js, Next.js, Tailwind CSS, Socket.io, WebRTC
Backend & Databases	Node.js, MongoDB, Supabase, Sql
Game Development	Kaboom.js, Tiled, HTML Canvas
Tools & Technologies	Figma, Git/GitHub, Postman, VS Code

Projects

Same Sky *Real-Time WebRTC Photo Booth for Couples*
Tech Stack: Next.js, TypeScript, Socket.io, WebRTC, Canvas API | [View Project](#)

- Built a two-person real-time photo booth where long-distance couples join via a room code and capture a synced photo together over peer-to-peer WebRTC video.
- Wrote a custom Socket.io signaling server for room/role assignment and offer/answer/ICE relay, and synced frame choice plus a 3-2-1 countdown over a WebRTC data channel.
- Composited both video feeds client-side with the Canvas API into a downloadable PNG; deployed as separate Next.js (Vercel) and Socket.io (Render) services. [Live demo](#)

E-commerce Platform *6th-Semester Full-Stack Project*
Tech Stack: Next.js, MongoDB, Supabase | [View Project](#)

- Built a full-stack e-commerce platform with Next.js, MongoDB, and Supabase, featuring an admin dashboard alongside a customer storefront.
- Integrated the eSewa payment gateway for localized online transactions in Nepal.
- Deployed live on Vercel at [na-pukhu-mini-market.vercel.app](#).

Top Down RPG *Long-Term Individual Project*
Tech Stack: Kaboom.js, Tiled, HTML Canvas, JavaScript, Vite | [View Project](#)

- Building a 2D top-down RPG from scratch in vanilla JavaScript and Vite, with Tiled maps rendered through HTML Canvas.
- Implemented character movement, sprite animation, collision detection, and path-finding logic for enemy NPCs.
- Refactored into modular files (player, map, enemy, physics) and is actively adding fight mechanics and a boss-battle system.

Mini Job *UI/UX to Frontend Project*
Tech Stack: Figma, React, TSX | [View Project](#)

- Designed a full UI and prototype in Figma, then converted it into a responsive React and TypeScript frontend with reusable components.
- Deployment: [mini-job-frontend.vercel.app](#) | [Figma Design](#)

Shopify Store *7th-Semester Shopify Learning Project*
Tech Stack: Shopify, Pinterest | [View Project](#)

- Built a hoodie e-commerce store on Shopify to learn platform-based, no-code e-commerce setup.
- Configured product listings, theme customization, and Pinterest marketing integration.

Punya Jewellery *Jewellery Storefront Website*
Tech Stack: React, Next.js, Tailwind CSS | [View Project](#)

- Built a responsive jewelry storefront in React, Next.js, and Tailwind CSS with a product gallery and contact section.
- Optimized for SEO and speed using Next.js image optimization.

Training & Certifications

- **Quality Assurance** — SkillShiksha: Completed a 2-day onsite workshop on software testing and release processes, covering API testing using Postman, test case basics, and production readiness for applications.
- **BIM Coursework** — Tribhuvan University
- **CS50** — Self-paced (YouTube)

Other Skills & Activities

- **Art Competition** — Participated in an art competition on the theme "How Environment Affects Our Health," organized by ENPHO (Environmental and Public Health Organization) under USAID in coordination with CIKKAB and Kathmandu Metropolitan City, held at Basantapur, Kathmandu (October 2022).
- **Gurju Course, Certified** — Completed a traditional Gurju course through the local Newar Buddhist community as a member of the Bajracharya lineage, learning the foundational principles and practices of Vajrayana Buddhist puja rituals.
